Connecting to Portfolium

This guide explains how you can connect to Portfolium and create your own portfolio page.

Portfolium is an integrated platform, enabling students at the University of Newcastle to create a portfolio page. The platform helps you display your course work, achievements, projects, and resume to prospective employers. You can link your Portfolium with your Canvas account to pull in assessment submissions you want to showcase on your Portfolium in addition to all your other achievements.

What is Portfolium?
Watch this YouTube video from Portfolium for an overview.

Using Portfolium in Canvas
Watch this YouTube video for tips around using Portfolium in Canvas.

How to access Portfolium

1. **Log into Canvas** and select **Account** from the Global Navigation Menu > click **Folio**

![Portfolium access](image)
2. Start building your Portfolium. You can click on Projects and you will be linked out to Portfolium.

3. Create your Portfolium account

4. Add projects, skills, work experience and more to build your Portfolium. To connect to Canvas select me and go to Settings.
5. In your settings you can edit your notifications, set your privacy and enable the connection with Canvas to import Assessment items you want to display on your Portfolium. To do this select Import Data.

6. Select Canvas and click continue.

7. Now you can import any assessment items you have submitted from your Canvas instance.
